

Edition 02

**Lighting is not just about illuminating a space,
it's about creating an experience.**

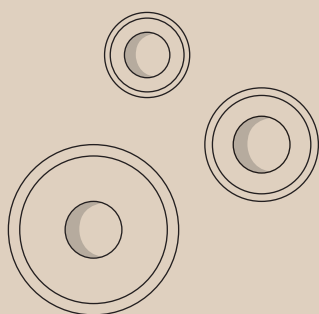

Light is more than just a functional element. It's the soul of a space, shaping the atmosphere, mood, and overall experience. The essence of correct lighting lies in its ability to transform a room, highlighting its features and enhancing its purpose. Whether it's the soft, ambient glow of a living room, the focused brightness of a workspace, or the warm, inviting lighting of a dining area, each space requires a tailored approach to meet both practical needs and aesthetic desires. Proper lighting can improve productivity, influence emotions, and even affect our health and well-being. It's the delicate balance between brightness, shadow, and color that creates an environment that feels both comfortable and purposeful, ensuring a harmonious connection between light and space.

At The Light Team we specialize in crafting luminaires that seamlessly blend natural materials and cutting-edge technology to create exceptional designs. Our collection features innovative lighting solutions that not only illuminate spaces but also elevate their aesthetic appeal. Whether it's modern minimalist designs, elegant fixtures, or customizable options to suit any interior, our products are created with the highest attention to detail and quality. Each luminaire is a statement piece, expertly engineered to enhance both functionality and ambiance, providing customers with lighting that is as beautiful as it is practical. With a passion for design and a commitment to excellence, The Light Team is redefining the way the world experiences light.

ACCESSORIES & GENERAL INFO

CEILING BASES

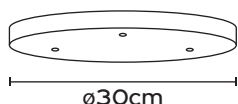

Our ceiling bases come in a wide variety of types, sizes, and colors to suit any design need. Available in three standard finishes—**White, Black, and Brass Gold**—they are thoughtfully designed to complement a range of interior styles. For added flexibility, **custom sizes and colors** are also available upon request, allowing you to tailor each piece to your unique project requirements.

Electrical insulation classes

	Κλάση I Η ηλεκτρική ασφάλεια εγγυάται από την κύρια μόνωση και πρόσθετο προστατευτικό αγωγό (γείωση) συνδεδεμένο με το μεταλλικό πλαίσιο λαμπτήρων. Η Γείωση είναι υποχρεωτική. Class I Electrical safety guaranteed by main insulation and additional protective conductor (earthing) connected with the metal lamp frame. Earthing is obligatory.
	Κλάση II Η ηλεκτρική ασφάλεια εγγυάται από την κύρια μόνωση και διπλή ή ενισχυμένη μόνωση. Η Γείωση δεν είναι απαραίτητη. Class II Electrical safety guaranteed by main insulation and double or reinforced insulation. Earthing not necessary.
	Κλάση III Η ηλεκτρική ασφάλεια εγγυάται από πολύ χαμηλή παροχή ρεύματος (μικρότερη από 50 Volt). Η Γείωση αποκλείεται. Class III Electrical safety guaranteed by very low power supply (less than 50 Volt). Earthing excluded.

IP Protection

Ο Κώδικας **IP (International Protection)** IEC πρότυπο 60529, που μερικές φορές ερμηνεύεται ως Marking Protection Ingress, ταξινομεί και βαθμολογεί τον βαθμό προστασίας που παρέχεται από το περίβλημα μια ηλεκτρικής συσκευής ενάντια στην επαφή επικίνδυνων μερών, στην εισχώρηση ξένων σωμάτων και στην είσοδο νερού.

Οι βαθμοί προστασίας εκφράζονται συνήθως ως «**IP**» ακολουθούμενοι από δύο αριθμούς, π.χ. IP65, όπου οι αριθμοί καθορίζουν το βαθμό προστασίας. Το **πρώτο ψηφίο** αντιστοιχεί στην προστασία που παρέχεται ενάντια στην είσοδο ξένων σωματιδίων και την ασφάλεια του προσωπικού. Το **δεύτερο ψηφίο** αντιστοιχεί στην προστασία από το νερό.

First Digit/ Πρώτο ψηφίο

IP0X	Καμία προστασία No Protection
IP1X	Δεν μπαίνουν αντικείμενα πάνω από 50mm Protected against foreign objects bigger than 50mm
IP2X	Δεν μπαίνουν αντικείμενα πάνω από 12mm Protected against foreign objects bigger than 12mm
IP3X	Δεν μπαίνουν αντικείμενα πάνω από 2,5mm Protected against foreign objects bigger than 2,5mm
IP4X	Δεν μπαίνουν αντικείμενα πάνω από 1mm Protected against foreign objects bigger than 1mm
IP5X	Δεν μπαίνει τόσο σκόνη όσο να επικαθίσει στο εσωτερικό Dust protected
IP6X	Δεν μπαίνει καθόλου σκόνη Completely dust-tight

The **IP Code (International Protection)** IEC standard 60529, sometimes interpreted as Ingress Protection Marking, classifies and rates the degree of protection provided by mechanical casings and electrical enclosures against intrusion, dust, accidental contact, and water.

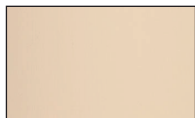

The degrees of protection are most commonly expressed as '**IP**' followed by two numbers, e.g. IP65, where the numbers define the degree of protection. The **first digit** shows the extent to which the equipment is protected against particles, or to which persons are protected from enclosed hazards. The **second digit** indicates the extent of protection against water.

Second Digit/ Δεύτερο ψηφίο

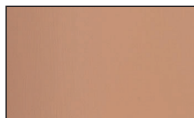

IPX0	Καμία προστασία No Protection
IPX1	Δεν μπαίνουν σταγόνες που πέφτουν κατακόρυφα Protected against vertically falling drops
IPX2	Δεν μπαίνουν σταγόνες που πέφτουν με κλίση μέχρι 15 μοίρες ως προς την κατακόρυφο Protected against vertically dripping water, when tilted 15 degrees
IPX3	Δεν μπαίνουν σταγόνες που πέφτουν με κλίση μέχρι 60 μοίρες ως προς την κατακόρυφο Protected against water spraying at an angle up to 60 degree
IPX4	Δεν μπαίνει νερό που ψεκάζεται από όλες τις κατευθύνσεις Protected against water splashing from any direction
IPX5	Δεν μπαίνει νερό που πέφτει υπό μορφή δέσμης απ' όλες τις κατευθύνσεις Protected against jets of water from any directions
IPX6	Δεν μπαίνει νερό από παροδική πλημμύρα Protected against powerful jets of water from any directions
IPX7	Δεν μπαίνει νερό σε παροδικό εμβάτισμό υπό δοσμένη πίεση και χρόνο Protected against immersion between a depth of 150mm and 1000mm
IPX8	Δεν μπαίνει νερό σε μόνιμο εμβάτισμό υπό δοσμένη πίεση Protected against submersion
